PROPERTY OF LEGISLATIVE LIBRARY STATE OF MISSOURI

JAN - 6 2011

[OMBUDSMAN FOR PROPERTY RIGHTS]

The use of Eminent Domain in the state of Missouri

Introduction

This report will outline the cases of eminent domain that the Office of Ombudsman for Property Rights have encountered throughout the year and the duties related to this office.

The controversial area of property rights and regulatory takings has created court battles between Property owners and condemning authorities, which has a mood of winner-take-all. The Missouri Legislature passed a new law in 2006, House Bill NO. 1944, the new law was based on recommendations from the Missouri Task Force of Eminent Domain. I will examine in this report if this new law has in fact improved the process and procedures of exercising eminent domain for the land owner and the condemning authority.

The Ombudsman is a full time position created to assist individuals seeking information regarding the condemnation process and procedures. This year the standardizing of the office procedures and going to an electronic case file system went online. I have created an office system that anyone who becomes the Ombudsman in the future will be able to walk into a viable working office.

Executive Summary

As the Ombudsman I have traveled the state of Missouri meeting with the property owners who have sought assistance from the Office of Ombudsman. This office has been beneficial to the land owners because it provides assurance that there is someone they can bring their concerns to and that someone is monitoring the eminent domain process. This year the Ombudsman office was able to bring on-line an electronic virtual rapid case filing system that was programmed by the Department of Economic Development. This will help monitor all aspects of the Eminent Domain process and make reporting more efficient. The goal of this office will be to "assist the property owners with all the information they need and to help resolve their disputes if possible".

Website

The Office of Ombudsman has an official website that can provide information about the eminent domain process to the landowner. The website was created in 2007 with the assistance of the Department of Economic Development; the website has several links of information on the topic of Eminent Domain. I have provided a Web Site Analytics Report that will show how this site has been helpful to Missourians who have contacted this site for information. I will be using this information when updating this web-site so that the information that people need is easy to find and updated.

The term "ombudsman" means people's advocate. In the public context, the ombudsman is an official, appointed by the government, responsible for investigating and resolving complaints reported by citizens. The ombudsman is a common place fixture in American governments, universities, and corporations. The ombudsman is a full-time position within the Office of Public Counsel and the offices are located in St. Louis. The ombudsman is a neutral position, operating within – but independent of – a government agency, which sole job is to answer questions from both owners and condemning authorities, with a goal to resolve property rights disputes.

Law usually intervenes at the last moment after they have received a letter from the condemning authority stating that they want to acquire land from the owner. When a law is used to take the land owner in the process of eminent domain, the owner is usually in a bad position. In such circumstances, an owner may be upset to learn that their specific grievance is not a common one, but they at least feel comforted that the law has been explained thoroughly by an informed and unbiased source.

Office of the Ombudsman for Property Rights

The Missouri Office of the Ombudsman for Property Rights is charged with assisting citizens by providing guidance, which shall not constitute legal advice, to individuals seeking information regarding the condemnation process and procedures. The Ombudsman is also responsible for documenting the use of eminent domain within the state and any issues associated with its use and shall submit a report to the general assembly on January 1, 2010, and on such date each year thereafter.

The term ombudsman means people's advocate, in the public context, the Ombudsman is an official, appointed by the government, responsible for investigating and resolving complaints reported by citizens. The Ombudsman concept itself is a common place fixture in American governments, universities, and corporations. The Ombudsman is a full-time position within the Office of Public Council, and the offices are located in St. Louis. The Ombudsman is a neutral position, operating within – but independent of – a government agency, whose sole job is to answer questions from both owners and condemning authorities, and to help resolve property rights disputes.

I am usually contacted by the landowner after they have received a letter from the condemning authority stating that they want to acquire land from the owner. I then make a site visit to the land owner to explain the process of eminent domain. Occasionally, our job is simply the bearer of bad news. In such circumstances an owner may be upset to learn that their specific grievance is not actionable, but they At least feel confident that the law has been explained sufficiently by an informed and unbiased source.

After receiving the initial phone call and providing the appropriate information to the property owner, I contact the condemning authority and explained the new law to them and to bring the land owners concerns to them for consideration. By increasing the flow of information and decreasing the hostility between the parties, I have enabled some parties to voluntarily resolve their disputes that arise during this process of eminent domain.

Property rights issues have been and will continue to be controversial. However, the wisdom of having a neutral third party to help advice and assist owners in achieving fair and equitable resolution of property acquisitions and also ensuring that the condemning authority obeys the law will help to resolve disputes.

Use of Eminent Domain in Missouri

This report will document the cases of eminent domain that have contacted my office during my tenure as the Ombudsman for Property Rights. The Office of State Courts Administrator compiles a database of court filings and produces an "annual report" that describes the types of cases filed in each circuit, and further broken down by county. This data base includes condemnation cases and exceptions filed, the only further breakdown of these cases concerns whether the particular condemning authority is either the "state" or "other." There is no further official Database describing each specific use of eminent domain. There is also a specific website for the Office of Ombudsman that shows the area of the state that citizens who are currently going through the eminent domain process. Those reports are documented in this annual report.

Issues that often arise in condemnation of property

When a condemning authority begins the process of acquiring property for a public use they become issues that come into play for the authority and the property owner.

Introductory Stage

The new law states that at least 60 days prior to initiating negotiations to acquire a property interest, the condemning authority must give a written notice to owner of record identifying the interest in real property to be acquired; the purpose for which the property is being condemned; and a statement of the property owner's rights: 1) the right to seek legal counsel, 2) to make a counteroffer and engage in negotiations, 3) to make a counteroffer and engage in negotiations, 4) to obtain the landowner's own appraisal, 5) to contest the condemnation proceeding, 6) to have just compensation determined preliminarily by a court-appointed condemnation commissioners and, ultimately, a jury.

Related Issues: I have experience property owners who become alarmed when they receive this notification from the condemning authority; there is a rush to judgment that they only have 60 days until they lose their property. Once I meet with them and explain the process and answer their questions they calm down.

Negotiation Stage

The condemning authority must negotiate in good faith and their offer must be based on an appraisal. If this case goes to a condemnation hearing and it is determined by a judge that good faith negotiations have not taken place, the court must dismiss the condemnation petition and order the condemning authority to reimburse the owner for his or her actual reasonable attorney fees and cost.

Related issues: This negotiation stage happens before the condemnation hearing in an effort to resolve the dispute of just compensation. Just compensation must be paid to a land owner in order for the condemning authority to take possession of the land. The financial amount to be paid to the land owner creates the most problems in this process. The issue of appraisals and how different the amounts from each appraisal are from the condemning authority and the land owners.

Condemnation Petition and Hearing Stage

If negotiations fail, a condemning authority must prepare a Condemnation Petition and submit it to the courts. The next step is the Condemnation Hearing; this is where both sides will meet in a court room before a Judge. The new legislation passed as HB 1944 in August of 2006 ought to make these hearings a fertile ground for property owners to inquire of the governing authority that is forcefully acquiring their homes or their commercial property. Property owners can now insist on all the proof of a) authority, b) necessity, c) public use, and d) good faith offers.

The judge will approve or reject the condemnation case at this time, if the condemnation is approved then an order of condemnation is entered, the court will appoint three disinterested commissioners, who must be residents of the county in which the property lies, to assess damages, if any that were caused to

the property as a result of the taking. Such assessment must be concluded in 45 days unless extended by the court for good cause shown.

Filing of the Commissioners' Report and the Distribution of Monies Stage

Related issues: The property owners have expressed concerns over their treatment by the condemning authority and would like to express their concerns to the court, but the judge does not allow that information to be stated in the condemnation hearing.

If the award of the award is not acceptable to you're the land owner, file exceptions to the commissioners' award within 30 days of the receipt of the notice of filing of the commissioners' report or the land owner will lose the right to further challenge the amount of the award. If the condemning authority is displeased with the award of the award it has two choices. It can, within 10 days of the

Filing of the Commissioners' Report

the condemnation report and file exceptions. The condemning authority can file an exception and also pay the commissioners award into the court. At this time the condemning authority can take possession of the land and also file an exception

When the report of the commissioners is filed with the court clerk, then the circuit clerk is to immediately forward the report to the recorder of deeds for recording. The clerk is also to forward a notice of commissioner's report and award to each party in the suit.

At this stage has many concerns: they could be happy with the commissioners' award and want the process of eminent domain of their property to be over. The condemning authority needs the property so they pay the award and the plaintiff continuing the legal process by taking the owner to a jury in order to receive some of the monies they paid to the land owner in the commissioners' award. This becomes a serious concern to the land owner and a situation many have felt they were not treated fairly by the condemning authority. The land owner has received the monies from the award but if the award is lowered by a jury in the continued legal action then they must pay back the difference to the condemning authority at an interest. This cloud of uncertainty brings much stress to the land owner whose has just lost their property to the condemning authority and knows might owe the condemning authority monies if a jury rules for the condemning authority.

Filing of Exceptions Stage and the Distribution of Monies Stage

If the amount of the award is not acceptable to you're the land owner , file exceptions to commissioners' award within 30 days of the receipt of the notice of filing of commissioners report or the land owner will lose the right to further challenge the amount of the award. If the condemning authority is displeased with the commissioner's award it has two choices. It can, within 10 days of the date of the filing of the award, elect in writing to abandon the condemnation, or the condemner may also file exceptions. The condemning authority can file an exception and also pay the commissioners award into the court. At this time the condemning authority can take possession of the land and also file an exception and continue on to a jury trial to dispute the commissioner's award.

Related issues: The land owner at this stage has many concerns; they could be happy with the commissioner's award and want the process of eminent domain of their property to be over. The condemning authority needs the property so they pay the award and the plan on continuing the legal process by taking the owner to a jury in order to recoup some of the monies they paid to the land owner in the commissioner's award. This becomes a serious concern to the land owner and a situation many have felt they were not treated fairly by the condemning authority. The land owner has received the monies from the award but if the award is lowered by a jury in the continued legal action then they must pay back the difference to the condemning authority at 6% interest. This cloud of uncertainty brings much stress to the land owner whose has just lost their property to the condemning authority and knows might owe the condemning authority monies if a jury rules for the condemning authority.

Case files for the year 2010

I will submit a list of case files of Missouri land owners who have contacted this office for the year 2010.

Conclusion

A primary duty of the Ombudsman is to "document the use of eminent domain within the state and any issues associated with its use. There are still concerns that the new law hasn't addressed all of the issues involved with the use of eminent domain by a condemning authority. The issues of just compensation, good faith negotiations, blighting of property, and the power of the condemning authority during the court process are all concerns raised by the citizens who are affected by this process.

The Missouri Secretary of State has approved the summaries for a group to proceed to seek voter signatures on petitions so that to limit the use of eminent domain. If they succeed, the measure would appear on ballots in November 2012. I have enclosed a copy of proposed constitutional amendment. I have also enclosed a copy of three appellate court rulings that happened this year dealing with eminent domain.

In conclusion, I have learned that the ideas of private property rights, due process of law and just compensation date back hundreds of years before the writing of our federal constitution. In the 13th century British nobleman demanded and received rights from the monarch including the right to own and possess property without fear of government entry or confiscation. The document was called the "Magna Carta." The ownership of property gives a citizen personal independence and the protection of property rights is essential to maintaining freedom, both political and economic, and to maintain a better standard of living for everyone.

REVIEW OF CONSTITUTIONAL AMENDMENT FOR EMINENT DOMAIN

Condemning authority's right to possession is delayed until the appeal is completed: Under proposed Section 26, a property owner can hold the condemnation process and the project hostage until the trial of exceptions is tried and appealed. Under the proposed constitutional amendment, the condemning authority can be prevented from taking possession of "condemned" property for two years or more after filing a petition. Moreover, the writ of possession tool used by condemning authorities will be rendered useless.

Under today's eminent domain process, a project can be timely planned and carried out because the appeal process challenging the right to condemn is structured to be handled quickly by a writ. Alternatively, a property owner can use the normal, more time-consuming appeal process, but it will not cause delay of the project. Under the normal appeal process where a condemnation order would be taken up with an appeal from the trial of exceptions, the condemning authority can still proceed with taking possession by filing a writ of possession shortly after paying the commissioners' award. However, the proposed new Section 26 transforms the normal appeal into a weapon to delay, if not stop, the project.

No right to possession until a final legal determination is made of the right to take: The changes are a result of the proposed new language in Section 26 which states that "until a final legal determination of the legitimacy of the taking is established...the property shall not be disturbed or the proprietary rights of the owner therein divested." What appears to be harmless language has the effect of giving a property owner the power to prevent the condemning authority from taking possession of property until the appeal is final - which could last for two years or more. This provision can give a single property owner the power to delay, if not halt, a project.

How a property owner can delay the process under the proposed Section 26. The manner in which the property owner can use an appeal to delay condemnation under the proposed Section 26 is simple - not withdraw the commissioners' award and file an appeal after the trial of exceptions. As long as the property owner does not withdraw the commissioners' award from the court, he has preserved his right to appeal the condemnation order at the conclusion of the trial of exceptions. As a result, as long as this appeal is ongoing, the condemning authority cannot take possession of the property owner's property. A trial of exceptions followed by an appeal can easily delay a project by two or more years. This scenario is the result of proposed Section 26: possession cannot take place until a "final legal determination of the legitimacy of the taking" has occurred.

Moreover, a writ of possession will no longer be useful. Because the property owner is appealing the condemnation order following the trial of exceptions, his possession cannot be disturbed during this entire trial of exceptions/appeal process is final. The new Section 26 states, in part: "Until a final legal determination of the legitimacy of the taking is established and until

compensation shall be paid to the owner, or into court for the owner, the property shall not be disturbed or the proprietary rights of the owner therein divested.

Fiscal impact to be considered by State Auditor. The fiscal impact of proposed Section 26, which the Missouri State Auditor is required to undertake, will be huge.

It has a likely possibility of increasing construction costs, if not stopping, every significant condemning authority's project. Many projects are federally funded that have requirements to use or lose the monies if not spent by a certain time. Moreover, construction costs would go up with delays. Contractors would be more hesitant to bid a lower price, if at all, because the appeal can delay construction of a project.

Other effects of the proposed Constitutional Amendment - 5 year sunset and no private ownership of condemned land: Note the 5 year sunset provision in Section 28.2 and no condemnation can take place which allows for private ownership (e.g. TIFs) under Section 28.1.

CASE LAW UPDATE - May 2010

NOTE: Some of the following is compiled directly from court prepared summaries or *per curiam* memorandum that are not part of the official opinions. In addition, some of the cases may have post-opinion motions pending or ruled on after publication. Reference to the appeal numbers is made to permit verification of the accuracy and precedential value of the decisions.

1. **PLANNED INDUSTRIAL EXPANSION AUTHORITY OF KANSAS CITY, v. IVANHOE NEIGHBORHOOD COUNCIL and BROWN-CALDWELL CHRISTIAN SCHOOL**
 - a. WD70655; Opinion by: Karen King Mitchell, Judge April 27, 2010.
 - b. This is a condemnation action in which the trial court found that Appellant Planned Industrial Expansion Authority of Kansas City ("Expansion Authority") failed to fulfill its statutory obligations to conduct good faith negotiations with the owners of the property that the Expansion Authority sought to condemn.
 - c. **AFFIRMED AND REMANDED FOR DETERMINATION OF APPROPRIATE APPELLATE ATTORNEYS' FEES.**
 - d. "Before a court may enter an order of condemnation, the court shall find that the condemning authority engaged in good faith negotiations prior to filing the condemnation petition." § 523.256 RSMo 2000. Under section 523.253, which section 523.256 incorporates, a condemning authority must submit an offer to the owners of the property to be condemned and, along with the offer, it must submit, among other things, an appraisal of property to be condemned or an explanation with supporting financial data for its determination of the value of the property. §523.253.2 RSMo 2000. In this case, the Expansion Authority attempted to comply with § 523.253.2 by submitting an appraisal along with its offer. In such cases, the appraisal must be "made by a state-licensed or state-certified appraiser using generally accepted appraisal practices." § 523.253.2(2). The trial court found that appraisals used by the Expansion Authority were not made using generally accepted appraisal practices, and therefore it dismissed the Expansion Authority's petition. The Expansion Authority argues that the trial court exceeded its authority in evaluating the credibility of its claim that the appraisers used generally accepted appraisal practices. We hold that the circuit court did not exceed its authority in so doing, and we therefore affirm. Further, we affirm the circuit court's award of attorneys' fees and remand for a determination of reasonable appellate attorneys' fees. § 523.256 RSMo 2000.

2. **RADER FAMILY LIMITED PARTNERSHIP, L.L.L.P. v. CITY OF COLUMBIA, MISSOURI**

- a. WD70907; Opinion by: Thomas H. Newton, Judge April 13, 2010
- b. Rader Family Limited Partnership, L.L.L.P. suffered damages to its building after a sewer backup. It was determined that the cause of the backup was grease in the sewer line and that the grease originated from restaurants upstream of the blockage. Rader sued the City under a theory of inverse condemnation, contending that the City had notice that concentrations of restaurants were likely to cause grease blockages, that the City failed to take preventative measures, and this was an unreasonable operation of the sewer system that caused the damage to Rader's building. The jury found for the City. Rader appeals, raising four points. **AFFIRMED.**
- c. Summary:
 - i. In its first point, Rader argues that the trial court erred in refusing to allow evidence of measures the City implemented to prevent grease-related sewage backups after Rader's building was damaged. The trial court excluded direct evidence of these measures under a rule that prevents the admission of subsequent remedial measures to prove liability in negligence cases. Rader first argues that the rule does not apply in this type of inverse condemnation suit, which springs from an underlying nuisance rather than negligence. Although this is not a negligence case, the trial court did not err in applying the rule because the public policy and evidentiary rationales behind the rule support its application. Rader also argues that even if the rule applies, the evidence it sought to introduce was admissible as an exception in rebuttal to the City's claim that the measures were not feasible. However, the record shows the trial court allowed rebuttal evidence during cross-examination to counter the City's claim that those same measures were not feasible options at the time of the incident. Finally, Rader argues that the trial court erred in excluding evidence of the City's subsequent actions as barred by sovereign immunity. However, the trial court's decision was based on relevancy concerns. Point one is denied.
 - ii. In its second point, Rader argues that the trial court erred in refusing to allow evidence that the Missouri Department of Natural Resources cited the City for a backup caused by a Wal-Mart in August of 2004, five months after the damage to Rader's building. We disagree. Evidence of the August 2004 citation for an unrelated backup had little probative value, if

any, to establishing the City's liability for Rader's backup in March 2004, and presented significant danger of confusing the issues, misleading the jury, and, most significantly, wasting time and creating undue delay. Thus, point two is denied.

- iii. In the third point, Rader contends the trial court erred in allowing the City to question Rader's appraiser about an appraisal of the building he performed in 2006, two years after the backup. The building's value in 2006 was not relevant to showing Rader's damages, which were sustained in 2004. However, the 2006 appraisal was relevant to the City's attempt to discredit the appraiser's estimation of the building's value in 2004. Point three is denied.
- iv. In the fourth point on appeal, Rader argues that the trial court erred in refusing to give its proffered verdict director. A verdict-directing instruction must hypothesize and require a finding of all the elements essential in law to establish the proposition which the verdict is based. The instruction given by the trial court required the jury to find that Rader had met its burden on each element of its claim for inverse condemnation. Although Rader argues the instruction incorrectly stated its burden of causation, we do not agree. The verdict director properly instructed the jury that it must find the City's unreasonable operation of the sewer caused injury to Rader, and required the jury to find the injury resulted in Rader's damages. Thus, point four is denied.

3. **ST. LOUIS COUNTY, MISSOURI vs ROBERT C. WATSON, et al.**

- a. ED93472; Opinion by: Kathianne Knaup Crane, P.J.; March 30, 2010
- b. The trial court awarded the landowners interest pursuant to section 523.045 RSMo (2000) on a damage award in an abandoned condemnation proceeding. **AFFIRMED.**
- c. Summary:
 - i. The last sentence of section 523.045 RSMo (2000) gives the trial court discretion to award interest on the amount of the commissioner's award if the condemnation is abandoned within the time frame and under the circumstances set out in the statute.
 - ii. This interest award represents compensation for the landowner's loss of the right to receive and use the money while the condemnation proceeding is pending.
